3rd International Workshop on Calcium Sulfoaluminate Cements

Monday 23 – Wednesday 25 June 2025
University of Leeds

Following the success of the 1st and 2nd International Workshops on Calcium Sulfoaluminate Cements at Murten, Switzerland (2018) and Rome, Italy (2023), we would like to extend our sincere thanks to the previous organisers for their invaluable contributions.

Calcium sulfoaluminate (CSA) based cements are receiving increasing interest as (i) an environmentally friendly alternative to conventional cement and (ii) as they can be used to formulate mortars and concretes with special properties such as fast set, high early strength, shrinkage-compensation, waste solidification, and ion immobilisation.

This workshop will bring together researchers working on several aspects of CSA cements with the different stakeholders working with CSA-based concretes in the industry. Gathering experts from all around the world will stimulate scientific discussions and can promote national and international collaboration. We aim at exchanging state-of-the-art knowledge on several topics including:

- Raw materials and clinkering
- Hydration mechanisms, admixtures, and fresh concrete
- Characterisation
- Durability and practice
- Applications: structural and immobilisation
- Nomenclature, standards, and protocols

Organising Committee

- Theodore Hanein, University of Leeds, UK (chair)
- Barbara Lothenbach, Empa, Switzerland
- Milena Marroccoli, University of Basilicata, Italy
- Vaishnav Kumar Shenbagam, University of Leeds, UK
- Antonio Telesca, University of Basilicata, Italy
- Frank Winnefeld, Empa, Switzerland

If you have any queries, please contact
Workshop Secretariat

Key Dates

- **Monday 2 December 2024:**
abstract submission deadline
- **Monday 3 February 2025:**
notification of acceptance
- **Monday 10 February 2025:**
start of registration
- **Tuesday 6 May 2025:**
early bird registration ends
- **Monday 23 – Wednesday 25 June 2025:**
workshop in Leeds
- **Sunday 31 August 2025:**
submission for special issue

Abstract Submission

Authors are invited to submit a one-page abstract for oral and poster presentation.

Upon abstract submission, the authors should indicate if they would like to be considered for a full paper submission in a special issue in "Advances in Cement Research". Selected authors will be invited based on the evaluation of the abstracts, and with consideration of equity and diversity.

RILEM is offering a one-year free RILEM membership to the best papers (awardees must be under 35, unlimited number of awardees) and the best paper awardee has the possibility to submit a paper to RILEM Technical Letters.

The Institute of Concrete Technology will also award a prize to the best oral presentation by a student.

Additionally, there will be an inaugural Bescher Award for the best presentation with capacity to generate immediate impact.
